The International Congress on Sustainable Collective Housing occurred at Escuela Técnica Superior de Arquitectura de Barcelona (ETSAB-UPC), between February 25th and 27, 2014 in the context of the 15th edition of the course “Master Laboratorios de la Vivienda Sostenible del Siglo XXI (MLVSSXXI)” directed by Josep Maria Montaner and Zoea Muxí Martinez.

From this first congress, it was proposed to organize an event, in a rotating way, every two years. This initiative aims to provide students, professionals and academics dedicated to topics related to architecture and urbanism, a space of reflection, on an international basis, about collective housing and its relationship to contemporary and historical city.

The IV International Congress on Sustainable Collective Housing - will be held from April 25th to 26th, 2020, in Alghero (Sardinia), in collaboration with the Department of Architecture, Design and Urban Planning (DADU), University of Sassari.

As in previous editions, this IV Congress will also feature complementary activities. During April 15th, 16th, 17th and 18th 2020, the Workshop Habitar al Presente will be held and, on April 17th and 18th the tours of Sardinia (routes through the region) will occur, providing the experience to get in touch with the urban form of the city and the residential buildings. In addition, there will also be a poster exhibition of papers related to collective housing.

Proposed papers to the IV International Congress on Sustainable Collective Housing are organized according to five themes:

1. HISTORICAL REVIEWS
   History and theory of collective housing
   Analysis of historical and contemporary collective housing projects
   Analysis of the transformations of domestic spaces

2. HOUSING THAT MAKES CITY
   Housing policies and urban regeneration processes, social innovation
   Regeneration scales: neighborhood, buildings and housing
   Self-organization and right to housing
   Housing integration processes: policies and projects
   The spaces under the house: inhabiting the public space

3. SOCIAL AND ECONOMIC ISSUES
   Other models of access, possession and use: cooperative forms, collaboration, housing sharing
   Variables of the housing emergency: “new” inhabitants, depopulation, tourism, immigrants, refugees
   Housing, cycle and Weltye
   Urban income and other financial models of housing production

4. REGULATIONS AND MANAGEMENT
   Management of affordable contemporary collective housing
   Housing policies and programs (social housing, sustainable living)
   Right to housing and the city
   Participation of the inhabitants in the management
   The quality of living

5. PROJECTS AND TYPOLOGIES
   Typologies and flexibility
   Influence of the role of gender in typologies
   Innovation from the typological unit
   Diversity of housing programs according to the typologies
   Typological requalification

Registration to the congress:

Up to 28/01/2019: 440€
Up to 31/07/2019: 750€
From 01/08 to 04/09/2019: 150€
From 01/12/2019: 750€
From 30/11/2019: 150€

Registration code to submit article:

Up to 31/07/2019: 150€
From 01/08 to 04/09/2019: 150€
From 01/12/2019: 300€
