ISC/REGISTERS REPORT OF ACTIVITIES 2016-2018

ISC/Registers meeting convened in Lisbon on the 6th of September 2016, at the Gulbenkian Foundation. There were two main themes discussed: the publication of a book with the fiches by Panayotis Tournikiotos and Marieke Kuipers, and the future of the Registers focusing into “good conservation practices”, that will be useful for new members or specialists in various parts of the world; this related to the theme of the 14th International Docomomo Conference “Adaptive Reuse. The Modern Movement towards the Future”.

Docomomo Chile proposed to have a meeting in Santiago, to further discuss the new fiche and its format. This meeting took place on March 23rd 2018, in the School of Architecture of the Universidad Católica, organized by Horacio Torrent with the NWP of Chile. The discussion on the new fiche was fruitful, and a format was established.

The book on the new fiches, proposed in Lisbon, did not prosper, and probably will not be edited.

In accordance with Docomomo International, the status of the NWP and their compliance with the fiches and MOMOVE entries established before, was maintained. All the Chairs of the NWP were informed in March 2018 through the Newsletter and in June with a personal message. We asked to have submitted 30 fiches and the information of at least 50 buildings for MOMOVE, but we strongly advised to reach 50 fiches and include 100 buildings in MOMOVE. In addition, we asked for two Good Practice Fiches, and a bibliography with 5 to 10 essential books or articles of the Modern Movement architecture in each country, with a photo of the cover. Unfortunately, less than 40 NWP responded, and only 22 complied with the Homework; it has to be added that a confusion in the wording of the Guidelines had many NWP thinking that only one Good Practice Fiche was required, and we decided to consider the Homework done for those who did so.

ISC/REGISTERS PLAN OF ACTION 2018-2020

ISC/Registers will continue monitoring the fiches turned by the new NWP, as well as the ones of the NWP that have not fully comply with this requirement. Also, it will insist on fulfilling the part related to MOMOVE.

Related to MOMOVE, and in accordance with Docomomo International, to assist in the uploading of the bibliography with photos.
Since the new fiches on Good Conservation Practice have been accepted by many NWP, we have now several good examples. The ISC-Registers will now decide, with Docomomo International, the best way to make them available to the community.
The plan for the documentation homework will be decided during the ISC/Registers meeting of August 28th 2018.
